

**07-076 Structural Biology
Research Associate I/Research Associate II**

Job Duties:

The Structural Biology group is seeking a highly motivated scientist with experience in molecular biology and protein expression. This scientist will be responsible for protein production in support of crystallization efforts on structure based medicinal chemistry programs and for enzyme assays utilized in high-throughput screening and lead optimization.

Position Requirements:

Candidates should have a B.S./M.S. in Biology or Biochemistry with 2 or more years related laboratory experience. The ideal candidate must have a solid background in basic molecular biology techniques and heterologous protein expression systems. Experience in baculovirus/insect cell expression systems is a strong plus. This laboratory position requires strong organizational, problem solving, and interpersonal skills. The ideal individual should exhibit a strong motivation to acquire new technical skills and demonstrate an initiative to contribute to multiple aspects of our drug development programs.
