

Solix BioFuels Inc. located in Fort Collins, CO is looking for Research Associates to grow different algae species for biodiesel.

Solix Biofuels is an exciting new technology firm working on the commercialization of producing biodiesel using algae as feedstock. This technology holds promise to provide large quantities of renewable fuel at competitive prices in the near future. Solix works in close collaboration with the Colorado State University and is located near campus at the foothills of the Rocky Mountains in Fort Collins, CO. If you want to be part of a talented, motivated, high paced team, and are willing to work hard, Solix is for you.

Research Associate

- BS/MS in Botany or a related scientific discipline preferred
- Knowledge of aseptic techniques
- At least 6 months of experience working in industrial environment
- Hands-on experience with algae is desirable
- The ability to conduct experiments and knowledge of Lab equipment
- Need to be familiar with laboratory safety and good laboratory practices.
- The ability to be a team player
- Interpersonal communication skills with the ability to work in a team environment and build strong working relationships
- Strong organizational multi-tasking skills
- PC proficiency with MS Office

Responsibilities

Ideal candidate should be able to work with a team to grow and scale-up algae species – lipid producers.

Candidates for this position must be U.S. citizens or must be legally employable in the U.S

If this exciting opportunity sounds right for you, please e-mail your resume and a cover letter to careers@solixbiofuels.com
