

BiOptix Named a Top Innovator Winner

Award Recognizes Cutting Edge Private Companies Driving the Future of Innovation

BiOptix is pleased to announce that it has been selected as a winner of the annual New England Venture Summit Top Innovator award by youngStartup Ventures. The list of privately held companies recognizes those that play a leading role in innovation for the Technology, Life Sciences and Clean-tech sectors.

As one of the winners, Rick Whitcomb, President and CEO of BiOptix, will present the company at the exclusive 2009 New England Venture Summit on December 8th at the Hilton in Boston Dedham, where a select group of 450 entrepreneurs, investors, and corporate developers will gather to be the first to meet this next wave of leading edge companies.

“In the 9 months since closing our Series A funding (led by Boulder Ventures), the team has commercialized our science and we are now launching our pilot instrument into selected markets. Success in those segments will enable us to move into molecular diagnostics, where we can deliver value that other label-free technologies can’t.”

BiOptix is a Boulder, Colorado based life science tools company that has developed a novel instrument for the \$1B+ biomolecular research and drug discovery markets. The company is honored to have been recognized as one of the elite youngStartup Ventures finalists.

Honoring the Best

To honor the youngStartup Ventures Top Innovator recipients, youngStartup Ventures has invited their CEOs and founders to present at the New England Venture Summit, a forum for the most exciting early stage and emerging growth companies, and to share their insights on the future of innovation, and the entrepreneurial journey. Held at the Hilton in Boston Dedham, this intimate, invitation-only conference is the premier venue for today's promising startups.
