

Post – Doc Research Associate

National Jewish Health invites PhDs with demonstrated scientific expertise in either immunology or genetic engineering to apply for post-doctoral positions in the Center for Genetics and Therapeutics. The overall goal of this Center is to discover the etiology and understand the biology of immune-mediated conditions, infectious diseases, and lung diseases. The research projects will focus on the role of epigenetic mechanisms on immune phenotypes, and the development of humanized models of innate immunity. Applicants must have a Ph.D. and scientific accomplishments in either immunology or genetic engineering. Interested candidates should submit their curriculum vitae and contact information for three references to **Dr. Ivana Yang, National Jewish Health, 1400 Jackson Street, Denver, CO 80206** or yangi@njhealth.org. National Jewish Health is an equal opportunity/affirmative action employer. Women and minority candidates are strongly encouraged to apply.
