#### Sr. Research Assoc. Analytical Chemistry

OPXBIO, located in Boulder, Colorado, is using proprietary bioengineering technology to economically convert renewable biomass feedstock into bio-based chemistry and fuel products. We are seeking a team oriented, self motivated individual for the position of Sr. Research Associate, Analytical Chemistry. Successful candidates must be independent, self motivated, organized, and capable of self-directed day-to-day operation. Experience with more advanced analytical chemistry techniques such as method development needed. Requires understanding and efficient implementation of analytical procedures using HPLC and Empower software, as well as the ability to handle multiple projects concurrently. Effective technical communication and organization of results and protocols is a must. A related degree plus 5-8 years of analytical chemistry experience are required.
