REGISTER NOW

Dear Colleague,

The Genetics Policy Institute proudly invites you to attend this year's flagship event, the 2009 World Stem Cell Summit. Join the international stem cell community at the 5th annual Summit and experience 120+ compelling presentations covering today's most critical issues relating to embryonic, adult and induced pluripotent stem cells.

Register today and join us in the fabulous Baltimore Inner Harbor. With the NIH, FDA and Washington DC all nearby, the 2009 Summit has officially landed in the epicenter of the stem cell revolution.

Unparalleled Agenda

Comprehensive, timely and direct—the Summit agenda will once again cover the fields most pressing topics and answer your most challenging questions in business, science, policy and advocacy.

NEW – Science, Science and more Science

The 2009 World Stem Cell Summit will present a 3-day advanced science track encompassing

multiple hard science panels covering the field's latest discoveries and research breakthroughs.

Continuing Medical Education Credits

The Summit will offer CME credits jointly provided by the University of Maryland School of Medicine for AMA_PRA Category 1 Credit.

Thoughtfully Crafted Networking Opportunities

Your relationship building opportunities are maximized through highly visible special events and networking receptions, as well as advanced online partnering tools. The 2008 Summit attracted stakeholders from 25 states and 17 countries—expect more in 2009.

Leading Companies, Bankers and Venture Capitalists

A program with a sparkling array of speakers from thought leading companies discuss key financial and business issues relating to the ReGen Industry.

Stem Cell Policy

Detailed presentations relating to the new NIH guidelines for human embryonic stem cell research and federal funding opportunities.

Advocacy 2.0

Empowering strategies for 2009 stem cell advocacy efforts. Why and how foundations are serving as funding sources and much more.

Global Economic Development

With more than 50 exhibitors and country/regional pavilions, attendees will understand why countries are substantially investing in this burgeoning field. Global experts will address the path to expand global economic development towards basic research and translation.

2009 Hot Topics

Medical tourism, FDA clinical trials, cord blood banking, market trends, and in depth legal and regulatory issues. See disease-specific panels with the latest news on how stem cells impact Parkinson's / ALS / neurological disorders, cardiovascular disease, blindness, spinal cord injury, multiple sclerosis, cancer, diabetes, rare diseases and aging. Special panels include "Regenerative Medicine for Wounded Soldiers and Civilians," "Maryland's Investment in Stem Cell Science" and "Business Models for Successful Stem Cell Companies and Innovative Funding Mechanisms."

Special Events

Stem Cell Action Awards Dinner, Poster Sessions, Conversations with Experts Luncheons, and the Summit's exhibit hall with more than 50 exhibitors.
